BATTERY BACKPACK

RBV 130

- ❖ As daytime cleaning becomes even more prevalent the RBV 130 plays a key roll because at 45 dBa. it's simply one of the quietest vacuums on the market, and as a "cord-free" machine you can go anywhere without creating a trip hazard for other building occupants.
- ❖ A 1.5 gallon (6 quart) tank provides the capacity required for commercial cleaning, and the high efficiency filtration of the HepaFlo vacuum bag assures optimum levels of indoor air quality (IAQ).
- ❖ The patented rib design on the inside of the tank ensures maximum suction is maintained as the bag fills vs. other back packs that loose suction when the bag seals against the side of the tank cutting off the air flow, which also results in the causing the motor to run hotter, shortening its life.
- ❖ The 250 watt vacuum motor, powered by a 36 volt lithium ion battery, has a run time of 45 minutes providing plenty of power and operational capacity. Extra batteries can be purchased for extended run times. The battery is fully charged in 2.5 hours.
- ❖ At 16 pounds the RBV 130 is compact, comfortable and light enough for anyone to use.

Vac Motor	250 watt
Run Time	45 Minutes
Charge Time	2.5 Hours
Performance - Water Lift	45"
Performance - Airflow	50 CFM
Filtration	99.97% efficiency @ 0.3 micron
Capacity	1.5 Gallon
Weight	16 lbs.
Noise Level	45 dBa.
